Bellano

● Conference Lectern :

BELLANO is an elegant and at the same time the perfect lectern for presentations where a discreet lectern and a battery powered sound system are required.

Despite its transparent material, the optional battery, audio transmitter as well as cables of the microphones and lamp remain invisible hidden behind the metal plate.

The wireless transmitter, connected to the 2.3Ah battery, ensures Bellano up to 8 hours autonomous use.

In addition, this kind of wireless system associated to amplified PA sound systems e.g. Premio8 or Nomade allows an easy and immediate use.

Bellano combines aesthetics with functionality perfectly.

Options :

VIGI-M

Module battery - Mains gain adjustment
Built in battery with automatic charger.
Balanced line output on XLR 3 pins
for cable link or RP-6016 transmitter.

Light

Micro
